Additional Comments --"I think the class is too advanced for a first year organic class. I understand that it is for the majors, but I don't see why the grades are vastly different between the two classes of majors and nonmajors. I think it is taught at more of a graduate level and I don't understand why it has to be. It is too involved for a first year class and as majors, some of the material should be a little more involved and little more difficult, but not graduate school material. Also because the quizzes are so much like the test they need to be given out more in advance and graded faster." --Dr. Bracher is AWESOME. I am so grateful I had him as a professor and that he chose to come to Saint Louis. Thank you for challenging me this semester. --This is the best teacher I can ever find so far! --"Fantastic job! I never thought I would enjoy orgo, but I really did." --Dr. Bracher did a great job teaching this course. His enthusiasm and knowledge were key in helping me understand and apply the course material.
